

Sani+B

Standard Version

Sani+B is a sturdy sanitizing booth target to control the spread of infectious diseases with current situation.

Fully welded structure, it can be transported, installed, and ready to use without falling apart.

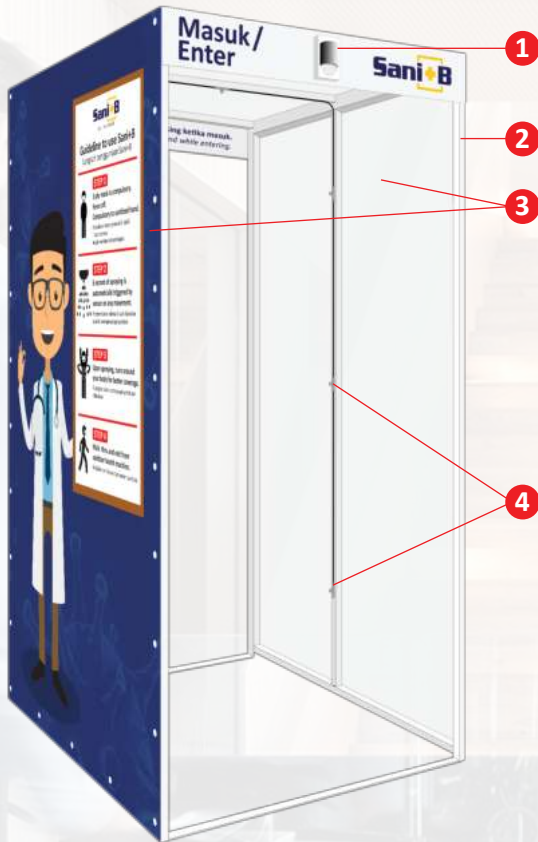

7-points nozzle to spray disinfectant mist to eliminate bacteria and virus.

Motion sensor will detect each person entering the booth and spray the individuals, there's no need for additional manpower to control.

Each person sprays 6 second of disinfectant, it can spray up to 2,500 person per day.

It can be installed in many areas such as hypermarkets, banks, schools, airport, construction sites, bus stations, railway stations, and any high-density locations.
